

PATHOSORB ABSORBENT

COMPONENT
PACKAGING

The Intelsius PathoSorb is a Super Absorbent Polymer (SAP) that ensures excellent absorption capacity to size ratio. Upon absorption during accidental spillage, PathoSorb acquires a 'gel like' consistency, locking in the spilled material for easy disposal. PathoSorb is lint free, reducing sterile contamination risk.

Category A and Category B transport regulations specify that absorbent material must be placed between primary and secondary containers in sufficient quantity to absorb the entire contents of the primary containers.

FEATURES

- ▶ PathoSorb utilises SAP technology to provide effective absorbency whilst maximising available payload space.
- ▶ For multiple sample transportation, PathoSorb 4 & 6 Bay pouches provide a dual purpose; simultaneously protecting and separating samples.
