## Install the app

- Search for "Tec4App" in the App Store or Google Play Store to install the app or scan the QR code of one of your devices

- Before using the app for the first time, you need to download and install it from the App Store or the Google Play Store, click "install" to do so

- When you use the app for the first time, it should look like this
- At the bottom center you will see an icon representing a QR code
- In the middle of the screen, you will see all scans of the last 48h
- When you start the app, you are automatically logged into the "Logistics" tab (see bottom left)
- At the bottom right, under the "Cloud" tab, you have the option to log in with your cloud login data

## 2 QR code scanning

- Click on the QR code icon to activate the camera function of your smartphone/tablet
- Now you can easily scan the QR codes of your Beacons
- The app recognizes the QR code, connects to the Beacon via Bluetooth and automatically transfers the data to the cloud

## 3

## Recent scans

- The list of the last scans contains all scans of the last 48h
- 48h after the successful scan and transmission of the data of a certain device, the scan is automatically removed from the list

The status of each scan is indicated by the following icons:

- Two green check marks: Scan & data transfer were successful
- One green tick: Scan was successful, data transfer not yet completed
- Red cross: Scan was not successful, please try again
- Rotating circle: Data transfer in progress
